PROFESSIONAL SUMMARY

Senior Manager and tech-enabled operations leader with a decade of software engineering foundation, now directing cross-functional teams across administration, HR, procurement, and finance. Builds and ships AI-integrated internal tools (Python, LLMs) that replace manual processes with self-service systems. Delivered ERP modules and production-grade web applications for enterprise clients including GCube Insurance, The Estée Lauder Companies, and Motherson Group before moving into operations leadership at Simactricals.

SKILLS

Technical: Python, C#, VB.NET, JavaScript, SQL Server

Tools & Platforms: Azure, Google Cloud Platform, Git, CI/CD, VS Code, Visual Studio, SSMS, Oracle DB, Crystal Reports, Help Studio

AI & Automation: Prompt Engineering, AI-Assisted Development (Claude, Gemini, Antigravity), LLM Integration

Domain Expertise: ERP, SCM, Insurance Platforms, Finished Goods Tracing, Vendor & Procurement Management

Leadership: Cross-Functional Team Management, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Senior Manager – Administration

May 2025 – Present

Simactricals Private Limited

- ▶ Direct a team of 9 spanning administration, HR, procurement, and finance, plus internal software and hardware initiatives, reporting directly to the CEO and COO.
- ▶ Architected and built an Employee Portal end-to-end in Python using an AI-agent-driven development workflow, replacing a manual, paper-based attendance and leave process with two-step digital approval routing for 12 employees.
- ▶ Launched an internal Policy Chatbot via LLM integration, cutting routine HR policy queries by 90% by giving 12 employees instant, conversational access to company policy.
- ▶ Designed and deployed a company-specific Project Tracking System adopted by 3–4 teams to track progress against internal workflows and reporting requirements.
- ▶ Built a Charging Data Dashboard delivering real-time, self-service test-case analytics, cutting manual reporting time by approximately 60%.
- ▶ Own procurement of components for R&D and testing, plus vendor management, accounts and finance operations, and brand-awareness initiatives.

Senior Analyst II – Software Engineering

Feb 2023 – Apr 2025

DXC Technology — Client: GCube Insurance, London

- ▶ Engineered and shipped new features and code modifications for an internal, web-based insurance platform used by insurance company staff, as a core member of the development team.
- ▶ Delivered production support for the platform, personally resolving 40+ tickets while maintaining a 99% ticket resolution rate.
- ▶ Extended the Help Studio documentation tool, streamlining internal support workflows.

Senior Executive

Apr 2021 – Feb 2023

Wipro Limited — Client: The Estée Lauder Companies

- ▶ Developed and supported Ecometry order-management applications, shipping new features and resolving software issues as part of ongoing platform maintenance.
- ▶ Maintained and enhanced the Cubiscan dimensioning application, including query optimization to resolve slow-running processes.
- ▶ Supported Stock Sync inventory-synchronization processes, troubleshooting and modifying code to keep systems running reliably.

Software Engineer

Jul 2016 – Apr 2021

MotherSumi Infotech & Design Ltd. — Client: MotherSum Group

- ▶ Built and maintained the eMPro ERP system using VB.NET and C#, supporting 500+ users across roughly 40 plants in India, South Africa, Thailand, and Mauritius.
- ▶ Designed and built a bulk QR-code stock-scanning application that replaced a manual scanning process prone to data loss during network interruptions, giving users a reliable bulk-submit workflow.
- ▶ Designed and implemented the Traceability module within the in-house ERP, enabling end-to-end finished-goods tracking.

EDUCATION

B.Tech, Computer Science & Engineering

Lovely Professional University | 2012 – 2016

CERTIFICATIONS

- ▶ Professional Certificate in AI & ML — IIT Kanpur, 2024
- ▶ Microsoft Azure Fundamentals (AZ-900) — 2022
